

RUBINI T

Aspiring Data Scientist

192,4th Cross Jayamoorthy Raja Nagar, Mudaliyarpet | Pondicherry | rubini29082006@gmail.com

SUMMARY

Motivated and detail-oriented B.Tech Artificial Intelligence and Data Science student with hands-on experience in AI, Machine Learning, Data Science, and Cloud Technologies through multiple internships. Skilled in Python, data analysis, model building, and cloud-based AI integration. Experienced in developing real-time AI/ML projects including face mask detection, home automation, and cloud-based chatbots. A fast learner with strong analytical and problem-solving skills, blending technical expertise with creativity in UI/UX and design. Committed to becoming a Data Scientist and delivering impactful, data-driven solutions.

TECHNICAL SKILLS

- Python
- C
- C++
- UI/UX
- AI/ML

SOFT SKILLS

- Communication
- Problem Solving
- Team Collaboration
- Leadership
- Critical Thinking

INTERNSHIP EXPERIENCE

AI on Azure – Edunet Foundation

May 2025– Jun 2025

- Learned AI, ML, DL fundamentals and real-world applications.
- Performed hands-on practice in supervised and unsupervised learning.
- Worked on regression, classification, and data processing tasks.
- Gained experience in Generative AI, Computer Vision, and Azure Custom Vision.
- Built and demonstrated a mini Deep Learning project using Azure tools.

AI /ML - Elevate Labs

Jun 2025– July 2025

- Performed data cleaning and preprocessing, including handling missing values, outlier detection, encoding, and scaling.
- Conducted Exploratory Data Analysis (EDA) to identify patterns, trends, and correlations using Python libraries.

- Built predictive models using Linear Regression for continuous value prediction.
- Implemented Classification models such as Logistic Regression, Decision Trees, Random Forests, KNN, and SVM.
- Applied K-Means Clustering for unsupervised grouping of data and pattern discovery.

Data Science Internship – Pantech E-Learning

Jul2025 – Aug2025

- Gained hands-on knowledge in Python for Data Science and core libraries like NumPy, Pandas, Matplotlib, and Seaborn.
- Learned data preprocessing techniques such as cleaning, handling missing values, encoding, and normalization.
- Performed exploratory data analysis (EDA) to identify trends, patterns, and insights.
- Built and evaluated machine learning models using algorithms like classification and regression.
- Completed a data science mini-project applying the full pipeline

AI & Cloud - IBM Skillsbuild

Aug 2025 – Sep 2025

- Completed orientation, IBM portal registration, and training in Cloud Computing and Artificial Intelligence fundamentals.
- Gained hands-on experience in Data Analytics, including EDA, cloud-based analytics, and practical lab sessions.
- Worked on AI Chatbot development, performing virtual sessions and cloud-based chatbot experiments.
- Learned core Machine Learning concepts, understanding ML problem statements and building basic models.
- Performed AI & ML experiments on IBM Cloud, explored AutoAI, and completed a final project and evaluation.

PROJECTS

Face Mask Detection With Live Alert System

Technologies used : Python, OpenCV, TensorFlow, Keras

- Developed a real-time Face Mask Detection System using Python, OpenCV, TensorFlow/Keras, and Haar Cascades.
- Collected and preprocessed masked/unmasked face datasets (resize, grayscale) for CNN training.
- Trained a Convolutional Neural Network (CNN) model using Keras to classify “Mask” vs “No Mask”.
- Integrated the trained model with OpenCV webcam stream for live detection.
- Implemented automatic alerts when a person without a mask is detected; optional deployment using Flask.
- Delivered outputs: trained model, detection script, video demo, and GitHub repository.

House Price Prediction

Technologies Used: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Jupyter Notebook.

- Built a regression model to predict house prices using Python and Scikit-Learn.
- Performed data cleaning, preprocessing, and feature engineering with Pandas and NumPy.
- Conducted Exploratory Data Analysis (EDA) and visualized trends using Matplotlib and Seaborn.

- Implemented algorithms like Linear Regression, Decision Tree, and Random Forest.
- Evaluated model performance and optimized predictions using metrics like RMSE and R² score.

AI-Based Travel Agent (Cloud + AI)

Technologies used : IBM Cloud/Azure AI, Python

- Developed an AI-powered Travel Agent Chatbot using IBM Cloud and AI tools.
- Integrated Natural Language Processing (NLP) for understanding user queries about destinations, budgets, and travel options.
- Implemented cloud-based experiments for chatbot training, intent recognition, and response generation.
- Applied data analytics and ML concepts to provide personalized travel recommendations.
- Completed deployment and testing on IBM Cloud, delivering a fully functional AI Chatbot for end-users.

Arduino Sensor Mini Projects

Technologies used : Arduino, Ultrasonic Sensor, LDR

- Designed and assembled the circuit on a breadboard using Arduino Uno, ultrasonic sensor, LDR, LEDs, and resistors.
- Programmed the Arduino to detect objects and measure distances using the ultrasonic sensor.
- Configured the LDR to sense ambient light and trigger the darkness indicator LED.
- Integrated the LEDs to respond appropriately to object detection and low-light conditions.
- Tested and successfully demonstrated the automated system, achieving real-time obstacle and light detection functionality.

EDUCATION

B.Tech - AI & DS- 8/10 CGPA Achariya College Of Engineering Technology	2023-2027 (Present)
HSC- 80% Thiruvallur Girls Government Higher Secondary School	2022-2023
SSLC - All Pass Trinity Blessing High School	2021-2022

Certifications

- Microsoft Azure AI Fundamentals
- IBM SkillsBuild AI & Cloud Certifications
- Pantech Data Science Internship Certificate
- Elevate Labs AI/ML Internship Certificate

TOOLS

- Figma
- Visual Code
- Lovable.AI
- WordPress
- Canva
- Google Colab
- IDLE
- Chatgpt
- Gamma

Languages

- Tamil
- English
